Portfolio Evolution

Correlation

Correlation is calculated between the fund's daily performances over last twelve months and those of subordinated bonds issued in Euro: Iboxx € Financial Subordinates TR Index.

Twelve months correlation may change significantly in comparison to the historical average since fund's inception. In a few circumstances, higher level of risk premium may persuade Fund anager to implement investment strategies with higher correlation to equity markets.

Correlation to Iboxx € Financial Subordinates TR Index

Dynamics of Portfolio Volatility

Portfolio's volatility on a one year period is calculated multiplying standard deviation of daily performances by an annualization factor. Sample returns are relative to last twelve months and depends on the the volatility of markets where the fund is invested.
